

# Web Dashboard with Plotly and Dash

Avery Jan

4-26-2022

# Introduction

This application creates an interactive dashboard using Dash and Plotly. The purpose of the dashboard is to extract data on US domestic airline flights performance from the “US airline reporting carrier on-time performance dataset” from Data Asset Exchange. The extracted data can be used to analyze the performance of the reporting airline so that they can improve flight reliability thereby improving customer reliability.

# Dataset

The Reporting Carrier On-Time Performance Dataset contains information on approximately 200 million domestic US flights (2005-2019) reported to the United States Bureau of Transportation Statistics. The dataset contains basic information about each flight (such as date, time, departure airport, arrival airport) and, if applicable, the amount of time the flight was delayed and information about the reason for the delay. This dataset can be used to predict the likelihood of a flight arriving on time.

# Application

- Import required libraries
- Create a dash application
- Clear the layout and do not display exception till callback gets executed
- Read the airline data into pandas dataframe
- Create a list of “years”
- Define functions for computing graph data for creating yearly airline performance report
- Define application layout
- Define callback function
- Add computation to callback function and return graph
- Run the app (code is in the folder)

# Performance Report (2005 vs. 2019)

US Domestic Airline Flights Performance

Report Type:

Yearly Airline Performance Report

Choose Year:

2005

Flight count by airline to destination state

% of flights by reporting airline

Number of flights from origin state

US Domestic Airline Flights Performance

Report Type:

Yearly Airline Performance Report

Choose Year:

2019

Flight count by airline to destination state

% of flights by reporting airline

Number of flights from origin state

Monthly Flight Cancellation

Average monthly flight time (minutes) by airline

Monthly Flight Cancellation

Average monthly flight time (minutes) by airline

# Delay Report (2005 vs. 2019)
